+639395480070

Quezon City, Philippines

Enthusiastic student with a strong interest in programming and software development, and UI/UX design. Eager to learn and expand my skills in various programming languages, frameworks, and technologies. Proven ability to tackle coding challenges and work on personal projects, showcasing dedication and determination to excel in the field. Actively seeking opportunities to contribute to real-world projects and gain hands-on experience. Committed to becoming a proficient and successful programmer and Web Developer.

EXPERIENCE

UI/UX Designer

UIP Inc.
2024 - 2024

In this role, I am responsible for designing user interfaces and experiences for web and mobile applications. I collaborate with cross-functional teams including team managers, developers, and other clients' bodies to gather and define requirements. Utilizing Figma, I create wireframes, mockups, and interactive prototypes to visualize design concepts and test user flows. I conduct user research and usability testing to gather feedback and iterate on designs, ensuring a seamless and visually appealing user experience. Additionally, I develop and maintain design systems and guidelines to ensure consistency across all products and platforms. I present design concepts and prototypes to clients and stakeholders, effectively communicating the design flow and adjusting based on their feedback.

Front-end Web Developer

UIP Inc.
2024 - 2024

In this role, I am responsible for developing and maintaining the front-end of web applications. I use technologies such as Bootstrap, Tailwind CSS, HTML, and JavaScript to create responsive and visually appealing user interfaces. I work closely with designers and back-end developers to ensure the seamless integration of UI components and functionality. My tasks include translating design mockups into pixel-perfect,

responsive web pages, optimizing web pages for maximum speed and scalability, and troubleshooting and debugging code to ensure a smooth user experience. Additionally, I implement best practices in web development to ensure accessibility and cross-browser compatibility.

Full-stack Web Developer

Freelance
2023 - Present

As a freelance Full-stack Web Developer, I take on small to medium projects, providing complete solutions for both front-end and back-end development. I use Bootstrap, Tailwind CSS, HTML, and JavaScript to build responsive and user-friendly interfaces. For the back-end, I work with PHP and MySQL to create solid server-side logic and manage databases. My duties involve understanding client needs, developing and maintaining web applications, and ensuring smooth integration between front-end and back-end parts. I strive to enhance website performance, follow security best practices, and ensure cross-browser compatibility and accessibility. Freelancing allows me to continually improve my skills and stay up-to-date with the latest web development trends and technologies.

EDUCATION

Polytechnic University of the Philippines

Bachelor of Science in Information Technology

- President's Lister (3rd Year, 2nd Sem, S.Y. 2022 – 2023)
- President's Lister (3rd Year, 1st Sem, S.Y. 2022 – 2023)
- President's Lister (2nd Year, 2nd Sem, S.Y. 2021 – 2022)
- President's Lister (2nd Year, 1st Sem, S.Y. 2021 – 2022)
- President's Lister (1st Year, 2nd Sem, S.Y. 2020 – 2021)
- President's Lister (1st Year, 1st Sem, S.Y. 2020 – 2021)

October 2020 – Present
Manila, Philippines

Springfield School of Novaliches

Senior High School, Academic Track (STEM)

- Valedictorian
- With High Honors
- Researcher of the Year '19 – '20

April 2020
Quezon City, Philippines

TECHNICAL SKILLS

Programming Languages

-PHP, JavaScript

Web Development Languages and Frameworks

-HTML, CSS, Bootstrap, Tailwind CSS

Database Management Tools

-MySQL

Productivity Software

-Microsoft Office 365, Canva

UI/UX Productivity Tools

-Figma, Canva

RELEVANT PROJECTS AND COURSEWORKS

Crust & Rolls Sushi Ordering Website (Web System) – Lead Developer

- Developed a web-based sushi ordering system using PHP, HTML, CSS, Bootstrap, MySQL, and JavaScript.

Sta. Lucia Senior High School Learning Management System (SLSHS LMS) – Lead Developer

- Designed and developed a user-friendly website to support online learning that fits senior high school curriculum grading system. Programming language utilized for this project is PHP, mixed with HTML, CSS, Bootstrap, MySQL, and JavaScript.

Vehicle Repair and Maintenance Management System – Co-developer

- Co-developed a website using PHP, HTML, CSS, JavaScript, and MySQL that helps clients communicate and request services from a vehicle repair shop, and enables admins to manage requests and tasks. Handled the back-end functionalities of the system.

UIP Inc. Main Website (Redesign) – Team Leader

- Designed the main website using Figma for mockups and final design. I also developed the front-end using Tailwind CSS to ensure a responsive and visually appealing user interface.

UIP Attendance Tracker (Redesign) – Team Leader

- As part of redesigning UIP Inc.'s Attendance Tracker, I utilized Figma to create mockups

and finalize the design. I co-developed the front-end using Tailwind CSS to ensure a responsive and visually appealing user interface.
